*Proficient in the MERN stack and experienced in creating multiple projects. Seeking a full-time role as a web developer to utilize my problem-solving abilities and technical skills.*

## EDUCATION

### CODING SHUTTLE

MERN - Full Stack Developer

October 2022- January 2023

### JIWAJI UNIVERSITY

Bachelor of Science in Computer Science

July 2017- March 2020

Percentage: 72%

## EXPERIENCE

### Skillops

Full Stack Developer

November 2023- Present

- Working with **Next.js** and **TypeScript** on the frontend, and **Express.js** with **PostgreSQL** on the backend, gaining extensive experience with new technologies and implementing complex functionalities to build robust and scalable web applications.

### JOBSDOOR360

Full Stack Developer intern

June 2023- September 2023

- Developed websites utilizing **HTML/CSS** and **JavaScript**, while employing **Firebase** for backend operations and user authentication. Also developed a Node.js web scraping tool for streamlined data extraction and analysis.
- Designed a portfolio analyzer that intelligently matches users with suitable job opportunities by executing queries in **Firebase** and presenting tailored results.

## PERSONAL PROJECTS

### CHAT APP: [Github](#)

- Built a MERN chat app with real-time messaging using **React.js** for frontend, **Socket.io** for communication via **Node.js**, and **MongoDB** for data storage.
- Implemented versatile features including one-to-one and group chats, user updates, deletions, and integrated **Redux** for state management and notifications.

August 2023

### RECIPE APP: [Github](#) | [Deployed](#)

- Created a MERN stack recipe app using technologies like **React.js**, **Node.js**, **MongoDB**, and **Express**.
- Users can discover preferred recipes via filtering, search functionalities, and gaining insights into ingredients and cooking procedures.
- The admin panel enables easy creation and editing of recipe details, providing efficient management capabilities.

May 2023

### COMIC LIBRARY (E-commerce): [Github](#)

- This e-commerce platform offers a diverse selection of superhero comic books and Japanese manga. The platform also includes a shopping cart and checkout.
- The technologies used are **React.js** and **Strapi**. Integrated **Stripe** as a reliable payment gateway, ensuring trusted transactions for customers.

January 2023

### INSTAGRAM CLONE: [Github](#) | [Deployed](#)

- Developed a full-stack Instagram clone web application using **React.js**, **Node.js**, and **MongoDB**.
- Designed and implemented a feature-rich profile page that allows users to view and edit their profile information, see their posts, and follow other users.
- Implemented likes & comments features allowing users to express their appreciation on posts.

January 2023

## ACHIEVEMENTS

- Placed in the top 3 at the Coding Shuttle hackathon for creating a full-stack Instagram clone with comparable features.
- Served as a Teaching Assistant in the Coding Shuttle, successfully resolved technical issues, and guided batch mates, facilitating learning activities, and leading to a positive learning experience for all the members.

## TECHNICAL SKILLS

**LANGUAGES AND TECHNOLOGIES:** Next.js | JavaScript | React.js | Express | Node.js | MongoDB | PostgreSQL | Firebase | HTML/CSS | SASS | Socket.io | RESTful APIs | Redux | CORS | Git | GitHub | Postman
